We cannot export issues from the "Issue Search" bulk update function as shown on your demo video. See attached image.

I am going to give tree break lines

This is just a paragraph with information. Currently this openspace is with lots of people. This has lots of consequences, like the immense heat and noise.

I am going to give tree break lines

Number of people: 23

Space: 43m^2

Turned on machines: 31

I am going to give one break lines

Task1

BIX-33

<p>If user logs in via SSO we want to prevent ZENQ-1119 and ZENQ-1152 from occuring and hide password and security pages altogether.</p>

Add a field to the user's browser session cookie that tracks whether the user logged in via SSO (e.g. SSOLogin = Y/N)
If user logged in using SSO:

Hide my settings password page (ZENQ-1130)
Hide my settings security page (ZENQ-1131)
Disable pw reset requirements (ZENQ-1152)
Do not force users to set pw and security challenge questions (ZENQ-1119)

Changing stuff

There are a few ways you can edit an issue, we'll let you know them all and then you can pick which ones you like best:

- Inline edit by clicking in the field you want to change. Try clicking here to edit this text.
- Keyboard shortcut:
- Jump to field using keyboard shortcut:

- Click the Edit button in the operations bar

⚠️ **Note**: some items in the view issue page, like the status and resolution, are only changed by workflow buttons.

Commenting

Adding comments is a great way to communicate with multiple people on an issue. As an example you'll see there's a question in the comment section at the bottom of this issue, try replying to the comment!
